

EMT/Trakref® asset-based software for SF6 gas tracking and management

emt
Experts in ultrafast SF6
gas analysis and handling

EMT/Trakref® SF6 management software provides a new way to track your SF6 emissions and operationalise SF6 compliance

At EMT, we understand the daily challenges that utilities maintenance staff and operations personnel face with tracking SF6 usage.

With increasing reporting requirements, from ever more demanding SF6 regulations, Environmental Managers now face the challenge of tracking and reporting correctly the SF6 use and emissions from their business.

Working with Trakref®, leveraging our combined 40 years of SF6 industry know-how, we deliver simple, affordable, and comprehensive solutions to manage your SF6 operations and compliance reporting needs.

Features

- Easy to use features, up and running in 48 hours
- Always up to date on compliance regulations
- Mobile app for service activity and labour tracking
- 1 click CARB subpart DD reporting
- Compliant for EPA Section 608 reporting
- Central repository of SF6 transactions
- Comprehensive leak tracking and custom alerts
- Eliminates guesswork and manages your compliance
- Optimises performance and streamlines data capture

EMT/Trakref® asset-based software for SF6 gas tracking and management

Put more time back in your day, eliminate compliance risks, and have greater system performance visibility - all without changing the way you work

The EMT/Trakref® cloud software mitigates compliance risks and gives you the features you need in one simple-to-use platform for asset management

- Reporting - simple, easy and ready
- Manage fixed inventory, store records, share information (capture images, tracking / shipping documents, etc)
- Manage history, service / maintenance
- Bar-code tagging of gas insulated assets (gas carts, systems & containers)
- Check in / Check out - install, transfer, sell, decommission
- Vendor management (3rd party contractors and suppliers) - Free portal for all vendors
- **Built-in push-button subpart DD reporting**
- Data validation and audit tools (ISO 14001 compliant)
- Advanced mobile app to track service event activity and gas transfers
- Available for both Apple and Android devices.

Multi-location, multi-system, multi-vendor management for your SF6 assets
