Insulating Gas Analysis & Handling

EMT is a Global leader in SF6 Insulating Gas technologies and solutions.

With over 75 years experience providing innovative solutions, contributing to global standards (IEC, CIGRE) and supporting clients' operations; EMT's Site Service division is ideally placed to support your onsite requirements.

Below is a selection of our standard services; for any other support requirements please contact us.

Got an SF6 leak or low pressure alarm?....

No Problem

SF6 Leak Surveys

- Comprehensive leak surveys utilising latest camera/ leak detector technologies for emissions of SF6 or new SF6 alternatives.
- EMT provides a detailed leak report of your asset with recommendations for remediation or repair.
- Compliance with F-Gas and Environment Agency regulations

SF6 Top-ups: Live or De-energised

- EMT's rapidly deployable team can provide SF6 gas top-ups
- Either de-energised or live, EMT top-ups can ensure the ongoing operations of your equipment until repair
- Comprehensive reporting allows for full audit traceability of SF6 used.

Leak Repairs

- Non-invasive repairs designed to reduce down-time and ensure operational continuity.
- Proven to either seal or reduce insulating gas leaks until more comprehensive repairs can be undertaken
- Custom solution to fulfil your requirements

Onsite Gas Analysis & Testing

- Report compliance with IEC Methods & Standards
- Leading equipment technology available for SF6 & SF6 alternative testing
- Superfast, accurate testing for maximum onsite efficiency

Need support with gas handling operations?

SF6 Recovery

- Need to remove SF6 gas from your asset? EMT's expert team can recover and purify your SF6 gas prior to maintenance operations removing the hassle.
- From solar panels to large GIS, EMT expertise and equipment can provide the full recovery solution
- Comprehensive reporting allows for full audit traceability.

Gas Cylinder Consolidation

- Lots of half empty cylinders, fed-up with being charged for returning SF6?
- EMT cylinder consolidation service ensures you maximise SF6 usage and reduce costs associated with cylinder rental and "heel" disposal charges.
